Liem Nguyen

UX Designer and Full Stack Developer

[email address] [LinkedIn URL] github.com/leithemaster

SUMMARY

UX designer who also writes production code. Designs user flows, wireframes and high-fidelity mockups, builds front ends in React and Angular with TypeScript, and treats accessibility (Section 508, WCAG) as part of the structure from the first sketch.

EXPERIENCE

Full Stack Developer, Sev1Tech — 2022-2024

NexGen at USCIS, an internal web application

- Built React UI components, feature enhancements and hook-based logic.
- Integrated APIs, wrote PostgreSQL queries and updated business logic in Spring Boot.
- Contributed to visual and interaction design through design review sessions and UX feedback loops.
- Took part in Agile sprint planning; improved usability and performance of core features.

React · TypeScript · Spring Boot · PostgreSQL · GitLab · Docker · Jira · Scrum

UI/UX Designer, Geocent — 2019-2022

Internal support portal for Marines

- Owned the design process end to end as primary UI/UX designer.
- Produced user flows, wireframes and high-fidelity mockups; made and tested UX decisions.
- Ran stakeholder feedback sessions and cross-team iteration through to stakeholder approval.
- Worked through developer handoff covering HTML/CSS layout and Angular component styling.
- Reviewed the product for accessibility against Section 508 guidelines.

Adobe XD · HTML · CSS · Angular · Jira · Section 508

[role], Fund Diet — 2018-2019

- [responsibilities]
